## **Golden Jubilee Celebrations**

Dear Alumni,

It gives me great pleasure to inform you that TKMCE will be completing 50 years of its exciting and eventful existence in 2008. To mark this momentous occasion we plan to celebrate the Golden Jubilee year starting from March 2007.

Fifty years is a significant landmark for any institution and the Golden Jubilee provides an occasion to celebrate our achievements and to embark on new initiatives. It is a matter of great pride for the

TKMCE family that today we are recognized as one of the leading institutions in India and abroad. This has been possible through the dedicated efforts of our management, faculty and remarkable achievements of our alumni in the fields of Science and Technology, Entrepreneurship and Management all over the globe. We have achieved a large number of successes, and yet have many more milestones to cross. The challenge before us is to maintain our educational excellence and provide a boost to our research programmes in the emerging areas of technological developments.

We have planned several initiatives during Golden Jubilee year. We plan to invite the President of India as the Chief Guest for the inauguration of Golden Jubilee Celebration in March 2007. We are planning to invite Chancellor/Vice Chancellors of Universities, Veterans from Science & Technology, Industries & Commerce, Social/Cultural fields, General Education, Journalism and Ministers from State Government to visit us during the Golden Jubilee year and interact with the TKMCE community. We plan to convene a global alumni meet for 2 days along with the

## From the Editor's Desk

A few months from now, the T. K. M. College of Engineering will be celebrating the 50th year of its establishment. This is a milestone we have been looking forward to with joy and pride. As the Golden Jubilee draws near, we recall with gratitude and reverence Janab Thangal Kunju Musaliar whose vision and social commitment created this great institution and through it a great tradition of excellence in higher education. And a standing testimony to this great tradition are the nearly 15,000 brilliant engineers worldwide who have stepped out of the portals of this institution during the last 49 years.

Starting with 3 branches and an intake of 120 students in 1958, TKMCE has grown to become one of the largest Engineering Colleges in the country today. Currently the College admits 660 students annually for its UG and PG programmes. All the programmes conducted in the campus are accredited by the AICTE and two major departments - Mechanical and Civil are approved as Research Centres of the Kerala University. The College provides hostel accommodations for 1700 students, 1100 boys and 600 girls.

The TKMCE Alumni Association was formed in 1963 and today it has Chapters all over the world. All these Chapters meet frequently in their respective places and at the same time maintains an intimate relationship with the parent Chapter. The Silver Jubilee Reunion organised every year in the College by the Parent chapter is an opportunity for the members to reunite with their teachers and review their memories. The Alumni Association has instituted a number of scholarships for economically backward students with the help of its members. A point worth appreciating is the generosity of a few individuals who have come forward to meet the educational expenses of poor and meritorious students. The association maintains a book bank to lend book to needy students. A number of gold medals and cash awards have been instituted through the Alumni Association to reward academic excellence.

The Golden Jubilee Celebrations will commence in March 2007 and extend for one year. As former students of this great institution let us all come together to make the Golden Jubilee Celebrations a great success and a memorable one.

inauguration of Golden Jubilee Celebration. We look forward to your valuable presence with family on the occasion. We are also planning several International conferences, Cultural events and other get-togethers. We are undertaking a major exercise to build a few landmark state of - the - art buildings such as Convention Centre, Sports Complex, Information and Communication Technology Centre, Research Laboratories, School of Bioscience & Bioengineering, Centre for Nanotechnology, Society for innovation & Entrepreneurship, New Hostels, Community Centre, Hospital and Crèche.

We have set our goals to be very ambitious to take TKMCE to greater heights. We take this opportunity to make this personal appeal to you to come forward with your suggestions to take your Alma Mater to greater heights. The TKMCE family needs your support and suggestions to make a difference and the Golden Jubilee is an excellent occasion to do so.

With best Wishes,

## Golden Jubilee - an affair to remember

Dear Friends,

Thanks primarily to the great contributions made by our alumni; we can boast of a brand name that is globally recognized. A vibrant campus, complementing rigorous academics with very enjoyable social, cultural, and sports activities, has been the primary foundation of nurturing the young talent. While

the global brand essentially recognizes the TKMCE system as a whole, your institute has managed to carve out a special niche for itself. You will all be proud to note that, in the last years, in the TKMCE admissions through state entrance top performers chose to join TKMCE. A similar choice pattern is exhibited by incoming aspirants for our Post Graduate courses.

To be the first amongst equals, especially at high table of the state technical education system, is an extraordinary privilege. To sustain such a position is a still greater task. To become one of the top globally recognized institutes would require truly gigantic efforts. Your institute is committed to take the challenge head on.

This century will pose new challenges. India has finally discovered

itself and the nation would now have far greater expectations from its premier institutions than were contemplated in the past. New technologies based on pure and applied research, and innovative ways in which these are deployed to solve social problems, are going to be demanded of us. The industry and Government will now expect us to come up with new techno-business models to exploit scientific and technical research to become future engines of wealth generation.

It is amidst this exciting scenario, that we shall celebrate our Golden Jubilee. This window gives us an unprecedented opportunity to strengthen existing associations, build new ones, and lay the foundations for future partnerships. This will only be possible through involvement and active support from you all. You have always demonstrated your commitment by participating to many important activities and initiatives of your Alma mater. But this is going to be a very special occasion in our lives, and thus I would expect a little more than usual support from all of you. Please help by giving a little extra from your heart, mind, time and effort in the events and initiatives being planned. I invite you all for the global alumni meet scheduled for 3days along with Golden Jubilee Celebration inauguration. Let us all join to make our beloved institute, the great TKMCE, the greatest! Let us make our Golden Jubilee, an affair to be remembered by all future generations.

With Best wishes,

**Dr. M.C. Philipose**, Principal, TKMCE  
General Convener, Golden Jubilee Committee.
